

Permanent Paving Solutions for Driveways, Patios, Walkways

Retaining Walls Offering Beauty and Function

Benefits of a premier Interlocking paving system.

- Smooth Surface
- Industrial strength base.
- Lasers ensure a uniform surface.
- 1-2% gradual slope for effective drainage.
- Polymeric sand & Sand lock sealers provide clean flexible joints.
- Pavers consist of 8000 psi, fade resistant colored concrete.
- Pavers are ideal for harsh winter climates.
- High strength, dense concrete will not scale due to excessive freeze thaw cycles.
- Flexible paving system will not crack.
- Dozens of styles and colors available to work with any architecture.
- Eco/Porous pavers provide a GREEN alternative solution to storm water runoff.

Whether you have a challenging hillside, or just need to tame your yard, Wind River Stone Scapes has a solution for every retaining wall application.

We like to think of ourselves as creating real estate.

Wind River Stone Scapes offers complete design/build services for structural retaining walls. Where applicable, we provide engineered wall designs and P.E. stamped drawings.
